## Installation

**PLEASE NOTE:** Before installing the gas bottle mount it is strongly advised that you check the laws, rules and regulations for the transportation of gas bottles in your area.

1. First up is to attach the Gas Bottle Mount to the Spare Tyre Mount. We recommend sitting the mounts up against the tyre to work out what positioning will work best for your setup, ensuring that your rear door or rear bar swingaway are able to open unaffected.
2. Secure the Gas Bottle Mount to the Spare Tyre Mount using the M8 bolts, nuts and washers.
3. Position the Spare Tyre Mount on the tyre, and secure with the provided ratchet strap. We advise ensuring that the hooks are facing outwards with the ratchet at the top of the tyre.
4. Place the Foot Clamps through the gaps in the gas bottle rim as shown.
5. Thread the M10 knobs into the Foot Clamps and tighten until secure.
6. That's it, you're ready to hit the road and cook up a storm! The M10 knobs should be secure in most driving conditions, but If you prefer a little added security, we've also provided two additional sets of slots for a cam lock style strap.

### **Local Knowledge & Assistance**

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
